

# Installing the Heiltsuk Keyboard for PC

## Chromebook keyboard installation procedure:

1. Go to <https://heiltsuk.arts.ubc.ca>
2. Under the “Tools” section, click on “Keyboard”
3. On the Keyboard page, scroll down until you see the link that says “Chrome OS install”
4. Click Chrome OS install
5. Once the Chrome Web Store opens, click on the button that says “Add to Chrome”
6. A pop up will appear, click the button on it that says “Add extension”
7. Open a new tab in your browser and go to <chrome://settings/languages>
8. On the Settings page, scroll down until you see the section “Languages and input”
9. Click on the arrow next to the words “Manage input methods”
10. Scroll down the page and click on the box next to the word “Heiltsuk”
11. Scroll back up the page and click the arrow next to the words “Manage input methods”
12. Click on the word “Heiltsuk.” There should be the word **Enabled** in green underneath Heiltsuk once you click on it

## Using your new Heiltsuk keyboard:

1. To switch keyboards from your standard keyboard to Heiltsuk, click on the “EN” symbol at the bottom right hand corner of the screen and click whichever keyboard you would like to use
2. View the images in the "Keyboard Images" folder for a view of added keys and learn the key combinations in the “Keyboard User Guide” document

## If you want to remove your Heiltsuk keyboard:

1. Right click on the “H” icon in the top right hand corner of the browser
2. Click “Remove from Chrome”
